Facility: 50,000 sq.ft

LOCAL SERVICE. GLOBAL CAPABILITIES.

At Vexos, our individual locations hold specific industry certifications. We encourage customers to visit our facilities to experience how our internal systems focus on quality throughout the assembly and fabrication process.

EQUIPMENT

- 4 Panasonic™ SMT lines
- Wave solder, water wash
- 2D/3D X-Ray, AOI
- ICT, FP, boundary scan and Functional Test

SERVICES

- Electronic manufacturing services (EMS)
- New product introduction (NPI)
- 3PL
- Reverse logistics

QUALITY CERTIFICATIONS

- ISO 9001:2015
- ISO 13485:2016
- CGP certified
- Health Canada Medical Device Establishment Licence (MDEL) Number 15094

THE POWER OF A STRONG PARTNER

- Full-service EMS provider specializing in high-mix, low- to mid-volume programs
- 25+ years of electronics manufacturing experience
- Exceptional quality assurance and ISO certifications for key markets
- Unique global footprint to match your manufacturing requirements
- Flexibility to expand as your program grows

SECURITY PROCEDURES

Your safety is very important to Vexos.
Please review these essential safety instructions prior to your visit.

If you are injured, or an emergency arises please contact Management, and the appropriate person in your area.

Visitor badge required

No food or beverage is allowed on the operation floor

Stay within approved walkways unless escorted by a Vexos representative

Do not block Emergency Exits or Fire Extinguishers.

Use of cell-phone cameras prohibited

Yield to mobile equipment (fork truck operation is common - assume the operator cannot see you)

Do not touch operating equipment

ESD procedures must be followed at all times on the shop floor

Do not handle components or finished products without authorization

- Smock
- Heel strap
- Sign-in and test required

Vexos' ESD Control Program is based on the requirements and recommendations of ANSI/ESD S20.20 for the handling of Electrostatic Discharge Sensitive (ESDS) electronic parts, assemblies, and equipment susceptible to voltages greater or equal to 100 volts HBM.

The ESD Control Program is based on three principles

1. All ESDS items and related conductors including personnel must be bonded or electrically interconnected and attached to a known ground.
2. Removal of nonessential insulators from ESD protected areas and neutralization of charges on essential insulators via ionization.
3. Transportation and storage of ESD sensitive items outside an electrostatic protected area requires enclosure in static-shielding packaging.

Local Service. Global Capabilities.
